

MAYFAIR GREEN: Technical Environmental Topic:

Energy Management and Carbon

Welcome to Mayfair Training

*"To **connect** organisations and individuals to professional certified training solutions"*

Mayfair Professional Academy (MPA) is the body established to meet our vision. MPA offers three routes to certification:

- *Mayfair Certification*
- *Certified Business Programmes*
 - *Mayfair Green*
- *Professional Certification*

Each route has been specifically chosen to ensure that the diverse and wide needs of customers are met. Experience shows us that clients require outstanding academic programs, professional recognition and also bespoke customised solutions. All our solutions are focused on the knowledge and skills needed to perform in the real-world.

The challenges facing individuals and corporations are continually changing and we endeavour to focus on general management skills, business skills, and project management personal effectiveness with a focus on leading to Certification.

Technical Environmental Topic:

Energy Management and Carbon

Module Overview

Many business professionals & practitioners will also want more detail on the technical subjects that their business and organizations interact with. A series of “**Technical Environmental Topics**” will be offered at two levels; Introduction (1 Day) & Practitioner (2 day). (Attendees may wish to attend both days). The Introduction is targeted at Business Professionals seeking to explore and learn more about this Topic. Whereas the Practitioner 2 day programme, is for those professionals who have some knowledge and working experience in this field. Both are delivered by dynamic and experienced trainers, with many years of experience.

Attendees will be given the opportunity to discuss and share their own experiences and consider additional topics and their impact. Case Studies will be discussed and shared on the second day.

Introduction - for people **new** to the area and Business Managers (1 day course)

Practitioner - for those whose work requires a **greater level of technical detail and awareness** (2 day course). May have some hands-on experience or knowledge.

These are MG: Technical Courses

Duration

Introduction – 1 day & Practitioner – 2 day

Module Content

Topics covered during the course include:

- Carbon is quickly becoming the currency in which all operations and activities will be defined; which process is less carbon emitting? What investments should be made today to safeguard operations in the future? These are questions of sustainability, and this course will provide you with an introduction and update on:
 - What “carbon” is, why it is important, and the international drivers and trends towards a low(er) carbon economy.
 - How to measure energy and carbon, with case studies.
 - How energy management ties in with carbon emissions.
- Setting a practical foundation for an energy management system in your organization, which will help you manage both energy use to realize cost savings, and carbon to comply with international trends

This course is subject to change/updates . This course is part of a growing number of Technical Environmental Topics. If you wish to find out more about these course or are looking for a particular topic please email us!
