

Environmental Requirements for the Construction Industry

Welcome to Mayfair Training

*"To **connect** organisations and individuals to professional certified training solutions"*

Mayfair Professional Academy (MPA) is the body established to meet our vision. MPA offers three routes to certification:

- *Mayfair Certification*
- *Certified Business Programmes*
- *Professional Certification*

Each route has been specifically chosen to ensure that the diverse and wide needs of customers are met. Experience shows us that clients require outstanding academic programs, professional recognition and also bespoke customised solutions. All our solutions are focused on the knowledge and skills needed to perform in the real-world.

The challenges facing individuals and corporations are continually changing and we endeavour to focus on general management skills, business skills, and project management personal effectiveness with a focus on leading to Certification.

Environmental Requirements for the Construction Industry

Module Overview

This course is an introduction and overview of the increasingly important environmental legislation and considerations that affect construction. Individuals will benefit from this increased awareness. This course aims to help companies understand their environmental requirements either through legal needs or through client requirements, so helping them to comply with law and also remain competitive. This course is relevant to all staff employed in the built environment industry, from architects and designers to operatives and facilities managers.

Duration

This is a one day course.

Module Content

Topics covered during the course include:

- Understand the environmental issues facing the construction industry
- Have an appreciation of the environmental legislation relevant to the construction industry
- Understand the measures required to reduce and manage waste in construction projects
- Understand the key elements of an Environmental Management Systems (EMS)
- Understand how to respond to environmental incidents.
- Understand what is required for a risk assessment.

This course is subject to change/updates
