

MAYFAIR GREEN: Technical Environmental Topic:

Lean perspectives in the food and drink/ construction/ engineering

Welcome to Mayfair Training

*"To **connect** organisations and individuals to professional certified training solutions"*

Mayfair Professional Academy (MPA) is the body established to meet our vision. MPA offers three routes to certification:

- *Mayfair Certification*
- *Certified Business Programmes*
 - *Mayfair Green*
- *Professional Certification*

Each route has been specifically chosen to ensure that the diverse and wide needs of customers are met. Experience shows us that clients require outstanding academic programs, professional recognition and also bespoke customised solutions. All our solutions are focused on the knowledge and skills needed to perform in the real-world.

The challenges facing individuals and corporations are continually changing and we endeavour to focus on general management skills, business skills, and project management personal effectiveness with a focus on leading to Certification.

Technical Environmental Topic:

Lean perspectives in the food and drink/ construction/ engineering

Module Overview

Many business professionals & practitioners will also want more detail on the technical subjects that their business and organizations interact with. A series of “**Technical Environmental Topics**” will be offered as listed, however those organisations currently involved in this sector, can attend this programme to ensure they are compliant to international standards.

These Topics are technical and hand-on. Attendees must be ready to share, discuss and consider the method and operations of their own organisations. Opportunity will be given to organisations to present, fault find and review case studies in this field. In some cases, a site visit may be arranged with the attendees. If you wish us to attend your organisation, prior arrangement must be made.

Our sessions are delivered by dynamic and experienced trainers, with many years of experience.

You may wish us to customise this programme, specifically for you own organisation, please email us your specific requirements.

Duration

This is a one day course, two day course if there is a site visit

Module Content

Topics covered during the course include:

- This course provides an introduction to “thinking lean”; what it is, the drivers behind a lean process, and case studies into what lean perspectives can do.
- Depending on the sectors represented, the case studies will be specific to that industry.
- Methodologies for thinking lean will be explored and discussed.
- This course is for operations or resource managers wanting to streamline their process and produce more while consuming less and producing less waste

*This course is subject to change/updates . This course is part of a growing number of Technical Environmental Topics.
If you wish to find out more about these course or are looking for a particular topic please email us!*
